

PredicineATLAS™

600-Gene cfDNA NGS Assay

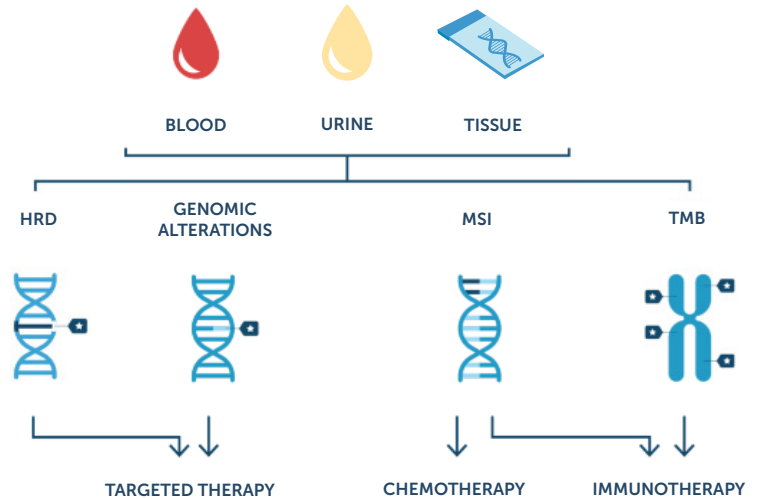

600 genes

Key cancer genes detected

0.001% VAF

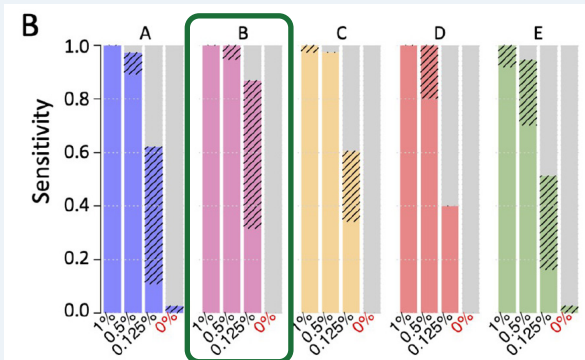

Reports down to 0.05% VAF (single timepoint)
& 0.001% VAF (longitudinal)

Note: some features are only included in the RUO version.
Additional information available upon request.

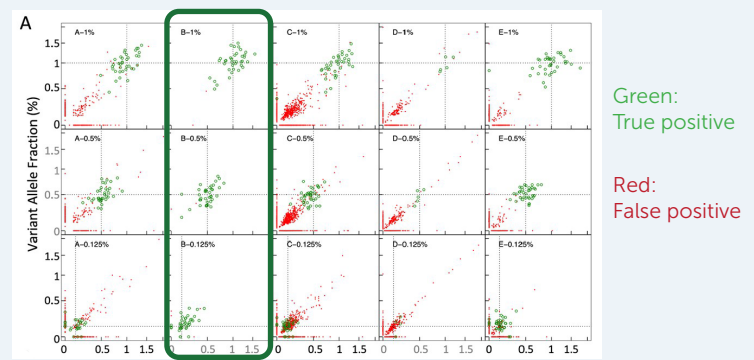

PredicineATLAS Outperforms 4 Peer ctDNA Platforms

PredicineATLAS showed the highest sensitivity at 0.125% VAF (10ng input)

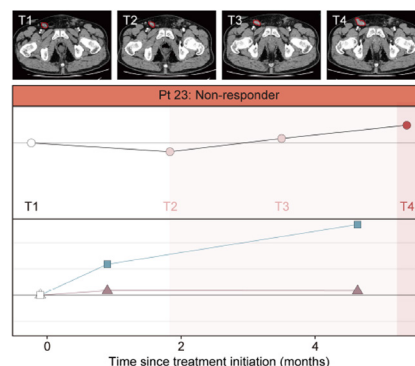

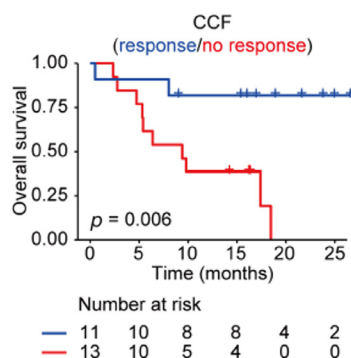

PredicineATLAS showed exceptionally low background noise

Yu, et al. PLoS ONE, 2022

ctDNA molecular response correlates with clinical outcomes
